

Table of Contents

Keynote	1
Integer Linear Programming in Computational and Systems Biology <i>Dan Gusfield</i>	1
Genomics	3
RepCalc: a Tool for Calculating Transposable Element Density within the Genome <i>Tamer Aldwairi, Benjamin Elam, Federico Hoffmann, Andy D. Perkins</i>	3
Practical Space-efficient Linear Time Construction of FM-index for Large Genomes <i>Elena Y. Harris</i>	9
Global optimization approach for circular and chloroplast genome assembly <i>Sebastien François, Rumen Andonov, Dominique Lavenier, Hristo Djidjev</i>	17
Adjusted Likelihood-Ratio Test for Variants with Unknown Genotypes <i>Ronald J. Nowling, Scott J. Emrich</i>	25
Genes and Gene-Disease Applications	31
Computing Gene-Disease Associations Efficiently <i>Kamal Taha</i>	31
Searching Jointly Correlated Gene Combinations <i>Yuanfang Ren, Ahmet Ay, Travis A. Gerke, Tamer Kahveci</i>	37
Analysis of Human Genes with Multiple Functions <i>Hisham Al-Mubaid</i>	45
Selection of Informative Genomic Regions for Closely Related Isolates and Construction of their Phylogeny <i>Anindya Das, Xiaoqiu Huang</i>	52
Data-driven Modeling	58
A Data-driven Biomarker Computational Model for Lung Disease Classification <i>David Gnabasiq, Gita Alaghsband</i>	58
A multiscale model explains the circadian phase dependent firing pattern variations in Suprachiasmatic nuclei and the occurrence of stochastic resonance <i>Shiju S, K Sriram</i>	64
cMutant : A Web Server and Compute Pipeline for Exploring the Effects of Amino Acid Substitutions via Rigidity Mutation Maps <i>Hunter Read, Kyle Daling, Connor Freitas, Filip Jagodzinski</i>	70
Integration of biomedical big data requires efficient batch effect reduction <i>Jane Synnergren, Nidal Ghosheh, Pierre Dönnnes</i>	76
Predicting Pathways from Untargeted Metabolomics Data <i>Daniel Salinas, Brendan Mumeey, Ronald K. June</i>	83
Machine Learning Applications in Bioinformatics	89
Automated Biomedical Text Classification with Research Domain Criteria <i>Mohammad Anani, Indika Kahanda</i>	89
The Flashing-Decision-Trees: Towards an Intelligent Seizure Prediction System <i>Arwa Ali Al-Rubaian, Ghada Badr</i>	95

K-means-based Feature Learning for Protein Sequence Classification <i>Paul Melman, Usman W. Roshan</i>	99
Protein Mutation Stability Ternary Classification using Neural Networks and Rigidity Analysis <i>Richard Olney, Aaron Tuor, Filip Jagodzinski, Brian Hutchinson</i>	105
Protein and Disease Applications	111
Analysis of Energy Landscapes for Improved Decoy Selection in Template-free Protein Structure Prediction <i>Nasrin Akhter, Amarda Shehu</i>	111
Myocardial Infarction Detection using Multi Biomedical Sensors <i>Mohammad Mahbubur Rahman Khan Mamun, Ali T Alouani</i>	117
Extracting Co-mention Features from Biomedical Literature for Automated Protein Phenotype Prediction using PHENOS- struct <i>Morteza Pourreza Shahri, Indika Kahanda</i>	123
Dynamics of Hepatitis C Virus Infection <i>Fathalla A. Rihan, Bassel F. Rihan</i>	129
Biological Sequences and Transcriptome	136
Identifying Translated uORFs based on Sequence Features via Tree-based Algorithms <i>Qiwen Hu, Steffen Heber</i>	136
Scalable Approach to Data Driven Transcriptome Dynamics Modeling <i>Alexandr Koryachko, Samiul Haque, Cranos Williams</i>	142
IsoRef Improves the Reference-Based Transcriptome Assembly Accuracy for RNA-Seq Data <i>Xiang Ao, Zicheng Zhao, Shuai Cheng Li</i>	148
Exploring Multi-Objective with Protein Sequence Alignment <i>Maha M. Abdelrasoul, Yaohang Li</i>	154
Bioinformatics Applications I	161
A Two-level Scheme for Quality Score Compression <i>Jan Voges, Ali Fotouhi, Jörn Ostermann, M. Oğuzhan Külekci</i>	161
Minimising the Deep Coalescence <i>Dawid Dąbkowski, Paweł Górecki</i>	168
State-of-Art Genomic Data Compression Technology <i>Dunling Li, Lin-Ching Chang</i>	175
Computational Prediction of Alternative Metabolic Pathways of Plasmodium Falciparum <i>Jelili Oyelade, Itunuoluwa Isewon, Olufemi Aromolaran, Efosa Uwoghiren</i>	181
Bioinformatics Applications II	190
Identifying Temporal Variation of Transcription in Populations <i>Aisharjya Sarkar, Prabhat Mishra, Tamer Kahveci</i>	190
Integrated Metabolic Flux and Omics Analysis of Leishmania major metabolism <i>Sushil Shakyawar, Sonia Carneiro, Isabel Rocha</i>	198
A Next Generation Sequencing Approach to Analyze Genes Expression in Breast Cancer Stem Cells <i>Anushree Tripathi, Gautam K. Verma, Krishna Misra</i>	204
Machine Learning and Sentiment Analysis: Examining the Contextual Polarity of Public Sentiment on Malaria Disease in Social Networks <i>Jelili Oyelade, Itunuoluwa Isewon, Efosa Uwoghiren, Olufunke Oladipupo, Olufemi Aromolaran, Michael Kingsley</i> ..	210
Author Index	219
